

AMENDMENT RELEASE — METRIC CITY SYSTEM UPDATE

SECTION 1 — Department Levels Structure

Metric City departments operate under a non-hierarchical lattice. No person oversees another; each role oversees metrics, not individuals. Workers collaborate with Departmental AI systems, ensuring alignment with Life-positive outputs. Supervisors oversee metric drift, not human behavior. Directors oversee long-range metric alignment. The Auditor oversees the global Life-to-Death arc.

SECTION 2 — Department Level Functions

WORKERS — Perform operational duties; ensure AI systems remain aligned. Housing + base pay + metric pay. DEPARTMENTAL AI — Executes logistics, routing, forecasting, and safety systems. SUPERVISORS — Monitor metric drift, ethical balance, and system stability. SUPERVISOR-AI — Analyzes supervisor metrics; maintains calibration integrity. DIRECTORS — Stewards of departmental purpose and systemic alignment. AUDITOR — Oversees all departments' metric lines and maintains Life-to-Death precision.

SECTION 3 — Base Pay System

Every citizen receives a guaranteed base salary expressed in Infinity (∞), pegged 1:1 with the USD. Base pay ensures housing, essentials, and life stability. All additional pay layers build on top of this universal foundation.

SECTION 4 — Pay Scale Formula

All wages are calculated by the unified formula: $R = B + (B \times L \times T)$ Where: B = Base Hourly Wage (∞ /hour) L = Life Impact Score (0–1) T = Time/Condition Factor (~1.0 standard) Total Pay = $R \times \text{Hours Worked}$. This ensures fairness, transparency, and alignment with the Life metric.

SECTION 5 — Current Currency Metric (Infinity System)

Infinity (∞) remains the operational currency of Metric City. Pegged 1:1 with the USD and backed by the City's gold reserve, Infinity provides stable monetary grounding. All payroll and departmental budgets operate using Infinity, ensuring clarity and accountability.

SECTION 6 — Future Currency Evolution (Energy Metric)

Upon the construction and activation of Metric City's nuclear and hydrogen generation facilities, a secondary energy-backed valuation system will emerge. This future system will supplement—not replace—Infinity. Pay formulas will remain unchanged but may be expressed in energy-equivalent units once stabilized.
